In the past two years India has shown global leadership in handling the COVID crisis and has produced close to 2 billion doses that have been exported to many countries. Indian majors have begun marketing their Biosimilars in developed markets. Recently, several MNCs have started increasing their investments in India. To provide an insight into India's fast-growing biotechnology sector, Bangalore Bioinnovation Centre (BBC) is arranging a meeting “**INDIA UNLIMITED**” on June 14. One hundred attendees from leading companies, investors and others are being invited to hear speakers from leading Indian companies, innovative start-ups and government of India officials on the achievements and opportunities that India presents.

5:45 - 6:00 PM **Arrival - Coffee / Tea**

6:00 - 6:10 PM **Inauguration** moderated by Jitendra Kumar (BBC)

6:10- 6:40 PM **India's Contributions to Biosimilars, Vaccines and Regenerative Medicine**

Stephen Sammut (Wharton) moderator, Tuhin Bhowmick (Pandorum), Aviruk Chakraborty (Archeron), Department of Biotechnology (Govt. of India),

India's role as a producer of vaccines through the Serum Institute of India, Bharat Biotech, Biological E and several others has been noteworthy. The Departments of Biotechnology (DBT), Health (DCGI) and ICMR of the Government of India played a proactive role in supporting the Vaccines R&D. The needs for vaccine supply during the pandemic, and the ever-present need for vaccines for recalcitrant and neglected diseases has come more sharply into focus. At the same time, the health needs of India include an expanding disease burden of noncommunicable diseases, many of which can be treated with biosimilar macro molecules. In order to meet the needs of the domestic population and other markets, India has been a leader in innovative processes and production for biosimilars. Furthermore, India continues to promote cutting edge technologies in tissue engineering and other approaches to regenerative medicine. Start-ups are also playing an important role. This panel discussion will explore progress on all these fronts in India and demonstrate how intervention in disease across the spectrum of disorders is becoming integrated.

INDIA UNLIMITED!

***Racing* towards a \$ 150 billion BioEconomy by 2025**

June 14 5:45 -8:15 PM San Diego (7 minutes walk from SDCC) USA

6:40- 7:10 PM **No Longer Plan B - INDIA - the new CDMO/CMO destination for Biotechs!**
Dinkar Saran (PwC) Moderator , Ashu Tandon (Syngene), DBT(Government of India)

The COVID pandemic and other international events have stressed global value chains impacting services and solutions at multiple points. Outsourcing pharma and biotech services is undergoing a rethink and International pharma and biotech companies are looking for hedging against disruptions by re-configuring their sourcing strategies. Consequently, there is a renewed interest in India as a destination for CDMO and CMO services. Panelists from leading companies will deliberate on measures they are taking to provide seamless services even under virtual circumstances.

7:10 - 8:15 PM **Networking coffee/snacks**

Click <https://forms.gle/if7xopMwasW24X4QA> to apply for invite.

A participation fee of USD 60 or INR 5000 per person will be payable within 24 hours of the confirmation by BBC after which the confirmation will be invalid. Payment details will be provided with the confirmed invite. BBC reserves the right to accept / not accept an application to enable a cross representation of stakeholders. Payments done without a confirmed invite will not guarantee entry. No Walk ins/payments are allowed. BBC reserves the right to waive the fees in specific cases or alter any condition. There will be no refunds for no-shows. However, substitution is permitted till June 13. 5:00 PM email anil.chauhan@bioinnovationcentre.com

Cosponsorships invited.

Deliverables for co-sponsors are.

- Publicity for co-sponsoring the event through social media.
 - Networking with visitors and investors from a number of countries.
 - 5 passes to invite co-sponsor delegates - that includes co-sponsor teams or clients.
 - One panelist opportunity for a senior level nominee who is well versed in the session topic
 - 4 slots available per session for cosponsors
 - Please write to anil.chauhan@bioinnovationcentre.com or call Anil +91 9871632688 for details
-
